Creating Powerful Learning Environments

Classroom Agreements:
In order to establish a safe, respectful, collaborative and effective learning culture, each class goes through the process of developing their shared classroom agreements. These agreements describe the behaviours and attitudes expected of each child and outline their routines, rewards and consequences. It is our expectation that all children adhere to these agreements and have a clear understanding that their choices have both positive and negative consequences on those around them. Upon completion, these agreements will be signed by your child and come home to you so that you will know and support the agreement your child has undertaken. We also go through the process of developing shared level agreements which clearly outline our shared expectations for the children’s behaviour, attitudes and interactions in the playground and at school events. Consequences for breaking these agreements are also clearly stated, again so that children understand and appreciate that their choices make a difference to all of us. We really value and appreciate the support you give us in helping to create a wonderful learning environment.

You Can Do It & Manners Matter:
The You Can Do It (YCDI) Program’s main purpose is to support our community, school and home in a collective effort to optimise the social, emotional and academic outcomes of all young people. Its unique contribution is in identifying the social and emotional capabilities that all young people need to acquire in order to be successful in school, experience wellbeing and have positive relationships including making contributions to others and the community (good citizenship). YCDI’s focus is on building social, emotional and motivational capacity of young people. It encourages prevention, promotion and intervention efforts in order to build the social and emotional strengths of young people. YCDI also seeks to build the capabilities of adults (community, school, home) associated with positive outcomes in young people, including positive, caring relationships with young people, providing for their safety, high expectations for achievement and behaviour. It is vital that school, home and communities work together so that the responsibility for supporting and educating, including quality social and emotional learning experiences and caring relationships, is shared throughout the community. Each fortnight we shall focus on one of the five social-emotional strengths of YCDI: Getting Along, Organisation, Persistence, Confidence and Resilience through the newsletter, during classroom discussions, activities and assemblies. (See appendix) Manners and the way we interact with each other in a positive, respectful and polite way is also a focus for us. Each fortnight, along with our You Can Do It focus, we will also be emphasising and promoting specific manners. They will be mentioned at each assembly, described in the school newsletter and each teacher will be proactive in promoting and expecting these manners to be demonstrated.

Soft Starts
We believe very strongly in the development of positive and respectful relationships and welcome the opportunity to get to know our students on a personal level. Consequently, students are welcome to come into our classes before school at various times, depending on the commitments of the teachers. Each teacher will let you know when their specific Soft Start times are and these times will be posted on the entrance doors to your child’s building.
English

English is central to the learning and development of all our EPS students. It helps create confident communicators, imaginative thinkers and informed citizens. It is through the study of English that individuals learn to analyse, understand, communicate and build relationships with others and with the world around them.

English at EPS is investigative, purposeful and explicit, with an emphasis on fostering and nurturing a love of all Literacy. The teaching of English reflects the intent of AUSVels (The Australian Curriculum in Victoria) and is inclusive of our students’ needs, backgrounds, perspectives and interests.

English is personalised through encompassing various and agreed teaching strategies and skills across all Year levels in the dimensions of Reading and Viewing, Writing and Speaking and Listening.

Our Agreed strategies:

**Writing:**
Writer’s Workshop and Components of:
- Immersion in texts and linking to reading
- Direct instruction using authentic literature or teacher’s/students’ own writing
- Independent Writing and time for sustained writing
- Teachers conferencing with individual students and keeping anecdotal records such as dates of conference, teaching points and discussions
- Guided Writing; working with needs-based, focused groups
- Sharing and celebrating students’ writing, giving opportunities for students to observe and learn from each other
- Use of whole class/individual notebooks
- Using seeds to launch the Writer’s Workshop: a springboard for ideas
- Explicit teaching of text types identified in team planning

**Reading:**
- Selection of Just Right Books
- Use of the Gradual Release model with teachers selecting reading strategies to suit students’ needs such as: Modeled, Shared, Guided and Independent reading with a focus on
  - Comprehension strategies of Predicting, Questioning, Visualising, Inferring, Summarising and Evaluating
- Reading Conferences and goal setting
- Book Club and Readers’ Notebooks
- Rhymes, chants, alliteration – phonemic activities and programs

**Spelling, Punctuation and Grammar:**
- Agreement of our six spelling principles
- Explicit teaching of the 5 spelling strategies (meaning, sound, visual, connecting and checking) linked to:
  - Students’ writing
  - Needs based, continual assessment and observation
  - Class focus
  - Student investigations of spelling patterns/sounds/roots

**Speaking and Listening:**
- Knowledge ready – supporting our students to get ready for speaking and listening situations, questioning, discussing, rehearsing
- Tuning into ideas – focus on tone and voice with the use of visuals for support
- Consolidate & review – reflection, self and peer feedback, continual improvement
- Linked strongly to our current classroom curriculum and opportunities from informal and formal presentations such as sharing our work, assemblies, peer tutoring and buddy reading.
Numeracy

Our focus in mathematics is to ensure that all children experience success in a safe, supportive but challenging learning environment. We provide students with many opportunities to explore and develop a deep understanding of mathematical concepts and ideas. We build their ability to think and work mathematically, with a heavy focus on the development of essential skills and problem solving strategies. Curriculum content in Maths includes the Domains of:

- **Number and Algebra** (place value, counting, operations, fractions & decimals, money and financial mathematics, patterns and algebra etc.)
- **Measurement and Geometry** (units of measurement, shape, location and transformation, geometric reasoning)
- **Statistics and Probability** (chance, data representation and interpretation)
- And includes a focus on developing Understanding, Fluency (which focuses on the recall of number facts and times tables), Problem Solving and Reasoning.

Children will learn about these concepts and ideas at the level that is appropriate to them, given their needs, strengths and areas for improvement.

We are very mindful that children learn best when their learning experiences are hands-on (using a wide variety of materials and resources), relevant, linked to the ‘real world’, authentic and open-ended. We also put an emphasis on developing each child’s ability to explain their thinking, justify the strategies they use and reflect on their progress and learning goals. Consequently we work very hard to monitor the progress and learning needs of our students so that we can support and extend their learning and ensure that we are providing them with learning experiences that are just right for them—thus ensuring their success and the development of positive attitudes and higher levels of confidence.

The way we teach mathematics in 2015 has changed very much since many of us were at school. We want, and indeed teach, children to question, wonder, challenge and justify what, and how, they learn. We pose questions and set problems that often have many different answers, or different ways of finding the answers, because our aim is to explore diverse mathematical thinking and processes as much as we aim to teach them to solve problems and find answers correctly. The most current educational research underpinning our approach to Maths learning and teaching outline five desirable mathematical actions for students:

1. **Conceptual understanding** – knowing the why and how of mathematical concepts, skills, strategies and relationships
2. **Procedural fluency** – carrying out procedures flexibly, accurately, efficiently & appropriately while having ready knowledge of facts and concepts (NUMBER FACTS & TIMES TABLES!)
3. **Strategic competence** – the ability to formulate, represent and plan to solve mathematical problems,
4. **Adaptive reasoning** – the capacity for logical thought, reflection, explanation and justification – being able to prove thinking and outcomes
5. **Productive disposition** – an inclination to see maths as sensible, useful and worthwhile, along with a belief in diligence (persistence) and confidence…it is really important that we as teachers foster a positive attitude towards maths!

Everything we do in planning our Maths Program is about building these understandings and competencies.

See attached for further helpful hints about how to help your child with the written algorithm.
Inquiry

Our approach to teaching across other learning areas, including Science, History, Geography, Civic responsibility and Design & Technology, also follows an investigative and inquiring approach. We believe very strongly that our personalised approach to learning is reflective of the most current research on 21st Century education and the skills required to act effectively in our changing world. This includes:

- Learning to generate, process and sort complex information
- Thinking systematically and critically
- Making decisions about and evaluating different forms of evidence
- Asking meaningful questions about different subjects
- Being adaptable and flexible to new information and situations (being able to apply meaningfully-learned knowledge and skills flexibly and creatively in different situations)
- Being creative
- Being able to identify and solve real-world problems.
- The ability to research, problem-solve, take risks (in a good way!), persist and be resilient

In Year 3 our inquiries will focus on:

- Health – learning what affects our physical, social and emotional health and how we can make positive choices to ensure we lead healthy lives
- Science: Earth and Space – exploring changes that occur on earth such as how shadows are formed and what causes day and night.
- History – Community and Remembrance – learning about how our local community has changed and remembering Australia’s first people
- Science: Chemistry – exploring what causes objects to heat and cool.

In Year 4 our inquiries will focus on:

- Civics and Citizenship – learning about the effects that individuals and groups have on our community and how we can also make a different
- Science: Physics – consolidating our notion of what makes a fair test and how to ensure our results are scientific. Students will investigate a variety of different forces and will focus on one to explore further through their own experiment
- History – the First Fleet: why the First Fleet came to Australia, what conditions were like on board the Fleet and what life was like for the first settlers and Australia’s first people once the First Fleet arrived.
- Science: Biology – investigating the life cycles of living things and how these life cycles are interconnected. Students will also explore the effects humans can have on these life systems.

In Year 5 our inquiries will focus on:

- Health – learning about the changes that occur during puberty, exploring identity and learning about ways to maintain healthy bodies and healthy minds.
- History – the Australian colonies, how the convict and colonial presence impacted the Aboriginal and Torres Strait Islander peoples and the environment, the gold rush and Eureka Stockade.
- Science: Physics – investigating light sources and how light forms shadows and can be reflected and refracted and exploring energy and electrical circuits.
- Science: Earth and Space – exploring the concept of Earth being part of a system of planets orbiting around the sun, as well as exploring how sudden geological changes or extreme weather conditions can affect Earth’s surface

In Year 6 our inquiries will focus on:

- History/Civics and Citizenship – Australia’s Federation and the key figures involved in Federation, Australian democracy including the rights of Aboriginal and Torres Strait Islanders, migrants and women, migration to Australia and the contribution of individuals and groups to the development of Australian society (which will tie into our leadership program where we will explore the skills need to be an effective leader).
- Science: Chemistry – exploring the different observable properties of solids, liquids and gases and investigating how changes to materials can be reversible or irreversible
- Science: Biology – investigating how living things have structural features and adaptations that help them to survive in their environment and learning how the growth and survival of living things are affected by the physical conditions of their environment
- Health – learning about the changes that occur during puberty, exploring identity and learning about ways to maintain healthy bodies and healthy minds.
Homework

Elwood PS implements a homework program that reflects current educational research, knowledge and experience in supporting children’s learning at home, and is reflective of our Homework Policy. Children in Grades 3 and 4 will bring home a new Homework grid each fortnight, while children in Grades 5 and 6 will keep the same, open-ended grid all year. Both grids include some essential tasks and offer a selection of other tasks that promote and extend learning beyond school and into many other aspects of their lives.

The descriptions on the front page of each Homework Grid should help you to support your child in completing the essential tasks and making choices about which of the other tasks they will complete. You can help your child by supporting their involvement in a range of activities, monitoring record-keeping and helping out where necessary (e.g. researching).

Each Level has developed a slightly different approach to their homework process, which best suits the age and expectations of their students. As children progress through the school both the quantity and the expectations for completion of the homework tasks becomes increasingly rigorous and challenging. For students moving into Secondary School the effective management of time and the ability to prioritise commitments become essential skills to develop.

Homework is intended to:
- Encourage children to recognise the many activities they participate in at home and in the community as valuable contributions to their growth and development, and an essential part of their whole education.
- Support children in taking responsibility and being organised by planning their time and recording their activities independently.
- Encourage children to monitor and broaden their experiences.
- Reinforce and practise skills learned at school.
- Promote curiosity and inquiry.
- Celebrate children’s achievements as a means towards being a balanced individual.

If you have any questions about our homework process or wish to know more about it, please contact your child’s teacher

Healthy Lunches & Allergy Awareness

We have a strong emphasis on health and wellbeing at EPS and we encourage all students to take some responsibility for the choices they make in relation to their own health and wellbeing. We also teach children to be aware of and thoughtful about the health and wellbeing needs of others and what they can do to support and help each other.

We have a number of students with food allergies and it is our policy at school to minimise the risk of allergic reactions at school by:
- Asking that you avoid sending your child to school with food which might in some way, through accidental contact, cause such an allergic reaction
- Ensuring that children do not share food at any time and that they wash their hands after eating
- Ensuring that children always eat in a supervised environment
- Regularly cleaning spaces where children eat
- Promoting an awareness of anaphylaxis, allergens, reactions and what they can do to help should the need arise.

We also encourage
- healthy fresh food lunches
- as little packaging/wrappers as possible

This year, Elwood PS will join local schools leading the move toward “zero waste to landfill.” As part of this leadership, we will have Nude Food Mondays. Each Monday we encourage all students to bring nude food – that is, food that has no packaging and wrappers. We will be collecting data and celebrating our achievements in cutting down our waste. Keep an eye on the newsletter for tips and delicious lunchbox recipes and ideas.
Monitoring Student Progress

Your child’s teacher is your first point of contact about any matter affecting your child’s happiness, self-confidence, development and progress in all areas.

Student Progress
A positive relationship and effective communication between home and school is vital in helping us gather the information and feedback we need to ensure your child’s learning is successful and that they feel secure and engaged at school.

If you have a question or concern about your child’s learning or wellbeing you should –

Work with the teacher:
- Make an appointment to discuss your concerns with the class teacher;
- Agree upon a strategy to trial;
- Meet again to review progress

Rules Relating to Electronic Communication & Internet Use

Email and Internet are educationally powerful forms of communication and learning. Our school’s ISP is the DEECD preferred Internet Service Provider, and is constantly vigilant in identifying and locking out inappropriate web sites.

When using e-mail, Internet and social media, students must always use good manners, and obey safety rules and copyright law.

Good Manners and Copyright Laws
- E-mails you send must always be polite and friendly.
- Should you receive an e-mail that is unfriendly or hurtful, do not answer it, but immediately inform a teacher.
- You may not use other people’s pictures or information on your own web pages without acknowledging your source and where possible, receiving the author’s permission.

Internet and Email Safety Rules
- Only use your first name in e-mails.
- Do not divulge your address or phone number in any electronic communication.
- Do not arrange real-life meetings with e-buddies from outside our school.
- The Internet may only be used for research and investigations approved by a teacher.
- Should you encounter any web page that you believe is inappropriate for students or makes you feel uncomfortable, inform a teacher immediately.
- You may not download (copy to a school computer) any file from the Internet without teacher permission.
- Internet Chat Groups are “out of bounds” unless they have been organised by a teacher.

Disregarding e-mail and Internet rules can be a safety risk and/or reflect badly on you and our school. It is regarded as serious misbehaviour.
Specialist Programs

ART
Level 3
Throughout Level 3 the focus of visual art is for students to learn a variety of skills and techniques to give them the tools they need to express their thoughts and feelings. My aim is for students to feel empowered and confident, and believe that they are all artists. Students’ interests and passions will be celebrated and will be used to support their learning. Students’ art will not be reproduced and orchestrated by me, but is a reflection of their thoughts and ideas. In level 3, students will develop a visual language around the art elements and principles. Students will be challenged with high expectations and will be empowered to create to the best of their ability.

Level 4
In our art room students are responsible for behaving like artists. Through art making, students will explore their own ideas, make personalized connections and apply what they learn independently. Students are given their own folio at the beginning of Year 5 that they continue to use in Year 6. The art room has a vast amount of materials, resources and support systems to encourage any type of creations. Students will work independently or collaboratively to express ideas and are encouraged in responding to the artwork of others.

Our self-directed responsible artists are expected to:
1. Come up with an idea and plan their art piece
2. Select and gather materials and tools need to create their art piece
3. Create with engagement, persistence and risk-taking
4. Clean up and store artwork
5. Reflect and celebrate not only their own artwork, but the artwork of others

When students bring their art pieces home, not only is it a reflection of their thoughts and passions, it is a product of their hard work and effort.

Assessment:
It is important to know and understand that everyone is an artist in his or her own way! Students are assessed on use of tools and materials, use of class time, and following classroom procedures and rules.

I look forward to a very artful year with your child! If you are interested in coming in to work on your artwork along side us, please come see me as we are always looking for artist to come visit the art room!
Dosch.leyna.l@edumail.vic.gov.au  www.ourartadventures.blogspot.com.au

Health and Physical Education
Level 3 & 4 Physical Education Lessons

Throughout the year students will be involved in Team Building tasks and problems to help develop their skills in working as a team and take on different roles. They will also develop basic movement and fundamental motor skills, ball handling and small sided games. They will cover striking and fielding games, invasion games, gymnastics, athletics and health/fitness education. They will refine and expand their range of skills, and perform them with increasing precision, accuracy and control in more complex games and activities.

They will explore using strategies within sport and will examine how these can be used to enhance game performance. The students will begin to set personal goals to improve performance in activities and sports. They will reflect on their skill development needs.

They will also develop an understanding of what roles they can take on as a leader. They will undertake a variety of roles when participating in sport, such as umpire and coach. They will be supported in taking responsibility for organising and conducting activities in which decisions are made about procedures, communication, rules, involvement and fair play.
Grade 5 & 6 students will be involved in Interschool Sports against schools in the Balaclava District. Students will represent the school in variety of sports throughout the year. Selected students will go onto District events such as the Swimming, Cross Country and the Athletics Carnival.

In Term 1, Grade 4-6 students will be able to trial for the District Swimming Carnival. Grade 5/6 Students will also choose from sports; Softball, Basketball, Cricket, Volleyball and Hockey and participate in the Summer Sports Round Robin day. Students who go through to the next round will compete in the Division Swimming Carnival. If the A team comes first in the Summer Round Robin, they will Progress onto the Division Summer Sports later in the year for their sport. Grade 5 students also take part in Bike Education Program, focusing on riding on the road. The program will run for 10 1 hour sessions.

In Term 2, Grade 5/6 students will choose from; Football, Soccer, Netball and Tee-ball and will participate in weekly interschool fixtures every Friday from 1:30-3:30pm. Grade 3-6 Students will also take part in the house Cross Country at Elsternwick Park. The student’s times will be used to select the Cross Country teams per age group (9/10,11,12/13 year olds) for the District Cross Country competition. Students who qualify will then go on to compete in the Division Cross Country Competition.

In Term 3, the early focus is on Athletics and students will rotate round each athletic event during level 4 Friday sport from 1:30-3:30pm. The grade 4-6 students then compete in House Athletics Carnival in every event as well as fun events. The top 2 competitors from each age (9/10,11,12/13), for boys and girls then are selected for the District Athletics Team. All students who qualify in District Athletics will then progress onto Division Athletics.

In Term 4, Grades 5/6 students will be involved in weekly Interschool Summer Sports against others schools in the district and will compete in one of the following: Rounders, Handball, Touch Rugby, Softcrosse and Lawn Bowls & every Friday. Also in Term 4 is the Grade 3-6 House Swimming Carnival. Grade 4’s complete their Bike Education program, which runs across 3 days. Grade 6’s complete their Beach Education Program lasting half a day.

Term 3

- House Athletics Grades 4-6 – **Wednesday 12th August**
- District Athletics – selected students from grades 4-6 **Thursday 27th August**
- Division Athletics – Qualifying students from District Athletics - **Wednesday 1st September**
- Lunchtime House Netball & Dodgeball

Term 4

- Grade 5/6 Weekly Summer Interschool Sport From Friday 16th October until Friday 13th November
- Grade 4 Bike Education **Monday 16th**, **Tuesday 17th** and **Wednesday 18th November**
- House Swimming Carnival-grades 3-6 **Friday 4th December**
- Beach Education Grade 6 **Monday 7th December**
- Lunchtime House Tug of War & Singing

Students are reminded to wear appropriate footwear and Uniform for the day/days they have sport as well as a hat and sunscreen. They also need to bring a water bottle to all activities.

They may also be asked to buy additional equipment such as Mouth Guards, Shin Guards etc. for certain sports. If they choose certain sports in grade 5/6. Grade 5/6 will sometimes be given a sport uniform for certain sports please make sure these are washed weekly and returned at the end of the competitions/term.

*Thanks Amy Parsons & Tara Devers*

**Library and I.C.T.**

I am very excited to be a part of our new Information Learning Hub this year and together with Debbie (Library Technician) and Daniel (Library Technician), we have a number of exciting opportunities in store for your children this year. All classes will be visiting the Information Learning Hub for an hour a fortnight, which will consist of both library and I.C.T. focussed sessions.

In the **library**, we will be:

- Promoting the very best of children’s literature to your children;
- Working towards getting (or keeping!) your children ‘hooked on reading’ by recommending and discussing specific books with each student when they are borrowing to make sure the books are ‘just right’ for them;
- Adding a number of the latest and most exciting new books for young readers to our library this year – picture books, novels, non-fiction books, graphic novels and more; and
- Having a lot of special events planned, including author visits and reading challenges.

Students are able to borrow up to 5 books at a time, and will be encouraged to borrow books they are already interested in as well as books that they may not have considered before (different genres, from different sections of the library etc). As well as each fortnightly class session (for an hour), the library will be also open for student borrowing at lunchtimes on Tuesdays, Thursdays and Fridays. The library space will also be open before school from 8:45 – 9:00am – families are welcome to come and browse together!

In **I.C.T.** we will be implementing the new Digital Technologies curriculum. Students will:

- develop their knowledge and understanding of digital systems (in particular hardware, software and networks and their uses)
- develop their knowledge and understanding of how data is represented and structured.
- Collect, manage and analyse data;
- Create digital solutions by defining, designing, implementing, evaluating, collaborating and managing.

Throughout all sessions, there will be a strong focus on being cybersmart. We will work through concepts such as cyberbullying, digital footprints, ‘netiquitte’, offensive content, online games, social networking and online friends, staying legal and unwanted contact.
If you would like to volunteer to help in the library or I.C.T. area, please come in and see me or send me an email...we’d love to have you! We have a number of things that you can help out with, from sharing computer knowledge or taking small group I.C.T. sessions to reshelving books, helping students locate a book or covering new books – what a fantastic way to get to know the new books in our collection! We really look forward to seeing you and we appreciate any assistance that you are able to offer. Also, if you are able to cover books for us but are busy during the day and would prefer to do it at home, let me know as we would still love to have your help 😊

Happy reading and computing!

Angela Dawson
Library and I.C.T. Teacher

Daniel
Library Technician

LOTE
Level 3 and 4 students will be studying Indonesian once a week with Kirsteen in the Indonesian room which is located in the JLC building.

Students will be exposed to both language and cultural studies of Indonesia during this program. Made will also be assisting Kirsteen during these lessons which is a valuable opportunity for students to converse with a native speaker.

The students will learn vocabulary associated with a range of topics including greetings, basic conversation, colours, numbers and classroom language.

Shortly your child will be sent home with a vocabulary/ phrase list so please encourage your child to speak in Indonesian at home - it can be fun for everyone to learn a new language! You may also wish to enrich your child’s language experience by participating on line with a great language site called Language Nut, there are vocab lists on many topics and great games and activities. The school currently subscribes to this site you can access it at www.langaugenut.com, user name- elwoo4791, password-elwoo0523, then click on Modern languages, select Indonesian.

We have also established a Sister School relationship with a school in Ubud in Bali. Our students will be given the opportunity to communicate with our new friends later in the year. If you would like more information about our Sister School please read the Indonesian notice board outside the Indonesian room.

Next term we have our ASIA CELEBRATION coming in June at the end of term two which is a fantastic week to celebrate the Studies of Asian cultures in our school community, we look forward to this great week!

Sampai Jumpa
See you later!

Kirsteen
Performing Arts

Music
Kaz Sieger will teach each grade Music once a week in the music room. Lessons are designed to invite students to participate in rich experiences to develop their musical skills. They are encouraged to work together successfully to create and share pieces of their own and apply their knowledge successfully. Across the grades students are introduced to notation, instrument playing technique, improvisation, form, call and response, folk dancing, music technology, podcasting, aural skills and many games. Term 3 we see the students begin rehearsals for the school production and perform for the community. Many ensembles and events take place during the year including Orchestra, 3/4 Choir, Senior Choir and House Singing.

Students interested in taking private music lessons can do so with one of talented music instructors in Brass, Woodwind, Guitar, Keyboard, Piano, Violin and Ukulele. Please ask for more information at the office about enrolling.

Grade 3
Students take part in learning recorder through a sequential and fun program. Once the students begin broadening their playing abilities and demonstrating good habits they may begin composing and performing accompaniment using hand percussion, xylophones and metallophones.
Grade 4
Students are provided the opportunity to broaden their knowledge of music through tasks combining more detailed notation, expressive playing and compositional devices. Students are asked to choose one of the more modern instruments to play each week to explore more deeply and perform in groups for the class. They may change instruments as there are many in the music room to choose from.

Grade 5 and 6
Students continue to build on their skills on a chosen instrument and form groups that feature different musicians from the class. They regularly work together to write and record their own material and perform versions of other songs too. They use the facilities to develop interpersonal skills and learn to be effective with their time. This year students have been invited to create Podcasts of the events in class and display for the community the process of working together and writing their songs.

Kaz Sieger

Performing Arts
Paula Russell teaches Performing Arts across all year levels within the school. Each class will participate in the program for one term per year. In Term Three the Performing Arts program will focus on the whole school performance. The program integrates dance, drama and singing. Students learn to express their ideas through exploring dance elements and different dramatic themes. Students use this knowledge to compose their own movement phrases or compositions. Students learn to appreciate and respond to their own and peer performances. The program aims to encourage creativity, peer relationships and an appreciation of the Performing Arts.

Paula Russell
Volunteers at Elwood Primary

Volunteering provides an opportunity for the school community to work together for the benefit of everyone at school. Our school values the contribution of all the parents, grandparents and other people in our community who generously give their time to assist and the children value having their families involved in school life.

What can Classroom volunteers do?
We appreciate your assistance, especially in those areas where parents have skills, knowledge or expertise to offer the children or time to assist with the following types of activities:
- leading book discussions,
- supporting small group work following Guided Reading,
- helping during student writing time,
- supervising small drama groups,
- typing work written by students,
- photocopying or laminating material
- making up class books and other projects,
- supervising small group mathematics work,
- supervising and helping children at classroom computers
- sharing skills in the Arts, Science and Technology Programs just to name a few.

Classroom Volunteers must read the Code of Conduct, You Can Do It and Handbook material and complete the School Classroom Volunteer Register form, which contains personal and emergency contact details. Whenever volunteers come to school to work in classrooms they need to sign into a specific classroom using the book provided and wear the Volunteer lanyard. When leaving, sign out and return the lanyard.

Volunteers, who work, specifically, outside the classroom i.e. in the Kitchen Garden, Kitchen, on Excursions, at Swimming or with Sporting Teams, must have an official “Working With Children Check” in addition to filling out the Volunteer Register form. Applications for a “Working With Children Check” are obtained and lodged through a Post Office. There is no cost involved and the cards are valid for five years. A photocopy of the card is kept for school records.

Volunteers participating in camps are required to produce a recent police check.

Some important points for volunteers in classrooms:
- Please remember to sign in and out using the book in the classroom you are working in and wear, then return the Volunteer lanyard
- Understand and use the “You Can Do It” Program ethos and terminology
- Be familiar with the Student Code of Conduct
- Be familiar with the School Values
- Use discretion and observe the understanding of confidentiality
- Try to commit to set times so that teachers can plan to include you in programs
- Feel secure that you are working under the guidance, sight and Duty of Care of the teacher at all times
- Encourage and support student risk taking in their learning
- Be friendly and have fun!

We look forward to seeing you and working with you.
Organisational Information

Additional Holidays
Students on vacation during term time are encouraged to read and write about their new environment and experiences.

Bikes/Scooters
All bikes and scooters are to be stored in the bike sheds and helmets are compulsory by law. Students are reminded not to ride scooters or bikes in the yard immediately before and after school for safety reasons.

Early Student Collection (Yellow Slip)
Any time you wish to collect your child from school before the end of the school day it is essential to sign them out in the Office. Complete and sign a ‘yellow slip’ then give to the teacher in charge of your child.

Lateness (Yellow Slip)
Students are expected to be at school before 9.00 am. This gives students time to prepare for class, catch up with friends or have a play and then start their learning on time without disruption. If students are late, they must be signed in at the office and the ‘yellow late slip’ brought to the classroom teacher.

Lost Property
Please clearly label all items such as clothing and equipment. The Lost Property bins are located in the Prep Building and outside the Senior School toilet area.

Sun Smart
All students must wear a hat in the yard from September to May and those not wearing a hat will be asked to sit in a designated shade area.

Excursions
Full school uniform must be worn on all excursions out of the school.

Uniform
School uniform is compulsory at Elwood Primary School. Its purpose is to promote a sense of pride, equal status and belonging amongst the students. The school uniform shop is located in the Senior School. The shop is open from 8.45 am each Monday & Thursday until about 9.30 am. Payment can be made by cash or cheque.

Thank you
